PROFESSIONAL EDITION

**Extensive lineup for all gym
concepts available**

EVOLGEAR's Professional Edition series offers an extensive lineup of products for all types of facility environments and purposes, including open gyms and personal gyms, as well as medical facilities, corporations, hotels, and condominiums. These high quality machines are also sturdy enough to withstand intense training and functional enough to provide effective training.

SELECTORIZED STRENGTH

The Selectorized Strength is a series that allows you to train with optimal form in accordance with biomechanics. The weights can be easily adjusted by a pin to suit your ability, allowing anyone, young or old, male or female, to train safely and effectively. There is a robust lineup of machines for different targets, and they can be used for all kinds of purposes, such as weight loss, rehabilitation, and body building.

PLATE LOADED

The Plate Loaded Series features a distinctive frame design that stands out from the rest. The grip is designed to be easy to grip with a natural trajectory similar to that of free weights, and the dynamic range of motion provides precise stimulation to the target for an effective workout.

This fitness equipment is robust and highly durable, making it ideal for beginners as well as advanced users engaging in intense training.

CABLE MACHINE

Cable Machine is a versatile piece of fitness equipment that seamlessly combines the advantages of both weight stacks and free weights, offering a dynamic and highly effective training experience. The pin system allows for quick and safe weight adjustments, while the free range of motion ensures the machine accommodates users of all sizes and fitness levels. With its adaptable design, a single machine can be used for a wide variety of exercises, targeting different muscle groups. Additionally, the system maintains consistent resistance throughout your workout, making it easy to train with full intensity and minimal load loss. Whether you're building strength, improving flexibility, or enhancing muscle definition, Cable Motion delivers a dynamic and reliable workout.

The Power Rack series offers a versatile solution for a wide range of exercises, all within a compact footprint. Engineered for durability, these racks can handle intense training sessions with heavy loads, making them perfect for the BIG 3: Bench Press, Squat, and Deadlift. Available in a variety of configurations, the series includes multi-functional racks designed for personal and home gyms, as well as larger models suited for open gym environments. No matter your training needs, the Power Rack Series is fitness equipment that provides the strength and versatility to support your fitness goals.

CROSS TRAINING

The Cross Training Series is a comprehensive, large-scale fitness system designed to accommodate multiple users simultaneously, enabling them to perform essential exercises like bench presses, squats, and deadlifts. This versatile series also includes customizable units that can be outfitted with monkey bars, sandbags, and other specialized equipment, offering a diverse range of training possibilities beyond traditional strength exercises. Whether for general conditioning or intense cross-training routines, the Cross Training Series offers the ideal fitness equipment setup to maximize performance and versatility in any training environment.
